

DESIGNWORKS ARCHITECTS, P.C.

DESIGNWORKS

In 2010, Designworks Architects celebrated its 25th year of practice. We are a green-oriented design firm specializing in commercial, non-profit and residential additions, renovations and new construction.

Designworks Architects offers a full range of architectural services, including:

Green Design

- LEED certification
- Programming
- Site and environmental analysis
- Schematic design, design development and construction documents
- Cost analysis and code research
- Specifications and materials research
- Americans with Disabilities Act Compliance
- Historic restoration complying with National Park Service Guidelines
- Interior design
- Project management
- Rendered drawings and models

We work corroboratively with clients to achieve functional and aesthetic solutions. Particular attention is paid to energy-efficient, sustainable design and the use of environmentally-friendly materials. Designworks Architects has achieved design excellence, appropriateness and quality for a variety of residential, commercial, not-for-profit and institutional clients. Our completed projects include LEED certification, historic restoration, multi-family housing, office and retail, and many new homes, residential additions and renovations.

Designworks Architects brings to each project highly-developed technical, design, graphics and communication skills to produce quality, sustainable results.
